JOURNAL

OF THE

American Society of Naval Engineers.

PUBLISHED QUARTERLY

UNDER THE SUPERVISION OF THE COUNCIL.

VOLUME LI.

1939

COUNCIL OF THE SOCIETY:

Rear Admiral S. M. ROBINSON, U.S.N.
Captain BRYSON BRUCE, U.S.N.
Captain J. M. IRISH, U.S.N.
Lieut. Comdr. J. B. DOW, U.S.N.
Captain J. A. FURER, (CC), U.S.N.
Comdr. CHARLES J. ODEND'HAL, U.S.C.G.
Mr. GEORGE B. FERRIER
Mr. HOWARD J. BALL
Lieutenant Commander GUY CHADWICK, U.S.N.

WASHINGTON, D. C.
R. BERESFORD, PRINTER, 605 F STREET, N. W
1939.

INDEX TO VOLUME LI, 1939

PAGE

A Derivation of Froude's Quasi-Dimensionless Coefficient $B_p = \frac{NP^{1}/_{2}}{V^{5}/_{2}}$ and Some Comments on Its Use as a Basis for Propeller Design, by Lieut. Commander J. M. Labberton, U. S. N. R. 340

Alsifilm, Out of the Mire (Note) 459

Amplitude and Frequency Modulation, Field Tests of, With Ultra-High-Frequency Waves (Note) 438

A New "Sheet Flow" Hydraulic Runner, by Henry F. Schmidt 239

Application of Supersonic Waves (Note) 285

Association Notes 149, 307, 481, 604

Baths, Electrically-Heated Zinc, for Hot Galvanizing (Note) 452

Beck, Cyrus; Calorific Value-Gravity Relationship of Fuel Oils 565

Bending Moment on Propeller Blades, A Simple Method of Calculating (Note) 145

Benson Boiler, Latest Developments of the (Note) 293

Better Steel Castings Result from Having Foundrymen Check Design (Note) 135

Bi-Metal Construction of High-Temperature Steam Valves (Note) 120

Boiler Tubes, Naval, Factors Influencing the Failure of, by Lieut. A. P. Calvert, U. S. N. 1

Boilers, Naval, Some Observations Concerning Metal Cracking in, by William C. Stewart 348

Book Review:—

The Radio Amateur's Handbook 148

Principles of Naval Architecture 483

Brazing Alloys in the Marine Field, Silver, by Robert H. Leach and Leo Edelson 56

Calorific Value-Gravity Relationship of Fuel Oils, by Cyrus Beck 565

Calvert, A. P., Lieut. Commander, U. S. Navy:—

Factors Influencing the Failure of Naval Boiler Tubes 1

Effect of Time and Elevated Temperatures on Naval Boiler Tubing 516

Carbon Copy (Note) 137

Cargo Motorship *Donald McKay*—First of the United States Maritime Commission C-2 Type Vessels (Note) 577

Castings, Steel, Better Result from Having Foundrymen Check Design (Note) 135

PAGE

Challenge, S. S.,—First of the Steam Driven C-2 Class Demonstrates Record Fuel Economy (Note) 582
Cimarron, U. S. S.—First American High Speed Tanker (Note) 573
Collapse of Hard and Soft Copper Tubes Under External Pressure, by Maurice G. Steele 524
Combustion Gas Turbine, Its History, Development and Prospects (Note) 409
Condenser Scoops, Investigation of the Action of, Based Upon Model Tests, by John R. Weske 191
Controllers and Starters for U. S. Navy Alternating Current Auxiliary Motors, by C. Huey 485
Cost of Motor Ships and Steamships, Relative (Note) 603
Crack Detection in Turbine Blades (Note) 112
Davis, R. C., Captain, U. S. N. (Retired); The Naval Inspection Service 83
Developments in Alloy Sections and Tubes for Marine Engineering (Note) 247
Diesel Engine Principle (Note) 600
Diesel Engines, High-Speed, Some Factors in the Lubrication of (Note) 455
Discussion and Comments, Paper on Investigation of the Action of Condenser Scoops Based on Model Tests, by Professor Weske in May, 1939, JOURNAL; by Henry F. Schmidt (Note) 460
Discussion of Lieut. A. P. Calvert's Paper, Factors Influencing the Failure of Naval Boiler Tubes, in February, 1939, JOURNAL; by Paul E. Jorgensen 303
Discussion of Commander Curry's Paper, Stopping and Backing Tests, U. S. Coast Guard Cutters *Duane* and *Campbell,* in November, 1938, JOURNAL; by Rear Admiral S. M. Robinson, U. S. N., Captain Lybrand P. Smith, U. S. N., and R. H. Tingey 101
Donald McKay, Cargo Motorship—First of United States Maritime Commission C-2 Type Vessels (Note) 577
Eaton, P. B., Commander (E) U. S. C. G.; Moving Picture Measurements of a Vessel's Speed Through the Water 80
Edelson, Leo, and Robert H. Leach; Silver Brazing Alloys in the Marine Field 56
Effect of Time and Elevated Temperatures on Naval Boiler Tubing, by Lieut. Commander A. P. Calvert, U. S. N. 516
Electrically-Heated Zinc Baths for Hot Galvanizing (Note) 452
Electrodes, Welding, by Hugo W. Hiemke 311
Enthalpy of Superheated Steam, by Fred J. Wiegand 99
Factors Influencing the Failure of Naval Boiler Tubes, by Lieut. A. P. Calvert, U. S. N. 1
Field Tests of Frequency and Amplitude-Modulation With Ultra-High-Frequency Waves (Note) 438

PAGE

First Steam Driven C-2 Class S. S. *Challenge,* Demonstrates Record Fuel Economy (Note) 582
Flight, Research in the Problem of (Note) 446
Flow of Compressible Gas (Note) 262
Frequency and Amplitude-Modulation, Field Tests of, With Ultra-High-Frequency Waves (Note) 438
Froude's Quasi-Dimensionless Coefficient $B_P = \frac{NP^{1/2}}{V^{5/2}}$, Derivation of, and Some Comments on Its Use as a Basis for Propeller Design, by Lieut. Commander J. M. Labberton, U. S. N. R. 340
Fuel Economy, S. S. *Challenge*—First of Steam Driven C-2 Class Demonstrates Record (Note) 582
Galvanizing, Hot, Electrically-Heated Zinc Baths for (Note) 452
Gas, Compressible, Flow of (Note) 262
Gas Turbine Challenges, by Lieut. Comdr. Warren Noble, U. S. N. R. 178
Gases, Inflammability of (Note) 600
Glareless Glass (Note) 277
Glass, Glareless (Note) 277
Glass, Invisible (Note) 276
Götaverken Pneumatic Engine (Note) 430
Hamilton, James E., Lieut. Commander, U. S. N.; A Short History of the Naval Use of Fuel Oil,
Part IV 35
Part V 214
Part VI 367
Part VII 540
Hiemke, Hugo W., Welding Electrodes 311
High-Speed Craft and Its Machinery, Some Aspects and Problems in the Development of (Note) 289
High-Temperature Steam Valves, Bi-Metal Construction of (Note) 120
Hooper, Stanford C., Rear Admiral, U. S. N.; International Telecommunication Conferences 153
Horsepower, Shaft, New Meter for Measuring (Note) 601
Huey, C.; Starters and Controllers for U. S. Navy Alternating Current Auxiliary Motors 485
Hydraulic Runner, A New "Sheet Flow," by Henry F. Schmidt 239
Ice Breaker Blades, Require Tough Steel (Note) 455
Inflammability of Gasses (Note) 600
Inspection Service, Naval, by Captain R. C. Davis, U. S. N. (Retired) 83
International Telecommunication Conferences, by Rear Admiral Stanford C. Hooper, U. S. N. 153
Investigation of the Action of Condenser Scoops, Based Upon Model Tests, by John R. Weske 191

PAGE

Invisible Glass (Note) 276

Labberton, J. M., Lieut. Commander, U. S. N. R.; A Derivation of Froude's Quasi-Dimensionless Coefficient $B_p = \frac{NP^{1/2}}{V^{5/2}}$ and Some Comments on Its Use as a Basis for Propeller Design 340

Latest Developments of the Benson Boiler (Note) 293

Leach, Robert H., and Leo Edelson; Silver Brazing Alloys in the Marine Field 56

Lubrication of High-Speed Diesel Engines, Some Factors in (Note) 455

Machinery of High-Speed Craft, Some Aspects and Problems in the Development of (Note) 289

Mercury Vapor Lamp, Water-Cooled (Note) 141

Metal Cracking in Naval Boilers, Some Observations Concerning, by William C. Stewart 348

Meter for Measuring Shaft Horsepower, New (Note) 601

Meter, Real-Height (Note) 283

Millionth of an Inch (Note) 141

Motor, Two Speeds With One (Note) 271

Motors, Petrol-Injection in Service (Note) 138

Motorship *Donald McKay,* Cargo—First of United States Maritime Commission C-2 Type Vessels (Note) 577

Motor Ships and Steamships, Relative Cost of (Note) 603

Motors, U. S. Navy Alternating Current Auxiliary, Starters and Controllers for, by C. Huey 485

Moving Picture Measurements of a Vessel's Speed Through the Water, by Commander P. B. Eaton (E), U. S. C. G. 80

Navajo, U. S. S., Ocean-Going Tug, Launched at Mariners Harbor 586

Naval Inspection Service, by Captain R. C. Davis, U. S. N. (Retired) 83

Naval Use of Fuel Oil, A Short History of, by Lieut. Commander James E. Hamilton, U. S. N.

Part IV 35
Part V 214
Part VI 367
Part VII 540

Noble, Warren, Lieut. Comdr., U. S. N. R.; The Gas Turbine Challenges 178

Noise Levels, Various, With Their Equivalent on Shipboard (Note) 137

Ocean-Going Tug *Navajo,* U. S. S., Launched at Marine Harbor 586

Oil, Fuel, A Short History of Naval Use of, by Lieut. Commander James E. Hamilton, U. S. N.

Part IV 35
Part V 214
Part VI 367
Part VII 540
